TECHNICAL TOOLS

Front-end:

React, React Native, Vue.js, Next.js, TypeScript, Sass

Back-end:

Node.js, Express.js, REST APIs

DevOps/Cloud:

AWS (S3, Lambda, CloudWatch, DynamoDB, KinesisFirehose, Glue, Athena, Cognito, ...), Docker

Testing:

Unit testing with Jest

DBs:

MongoDB, PostgreSQL

Tools:

Git, VS Code, Postman

LANGUAGES

English: Fluent

French: Native

CERTIFICATIONS

OpenClassrooms (Oct 2022)
Web Developer Certification

Covered: React, JavaScript, API, NoSQL, SEO/accessibility

Self-taught and results-driven Full-Stack Developer with 2+ years of hands-on experience in fast-paced startup environments. Skilled in building robust web applications using React, Node.js, and AWS. Passionate about writing clean, scalable code and continuously improving systems. Currently seeking a new challenge following the upcoming closure of my current company.

Professional experiences

Reach Up (Oct 2023 - Present)

Hired as a **Front-End Developer**, I naturally evolved into a **Full-Stack** role.

- Developed scalable features for a productivity **PWA** using **React Native (Expo)** and **TypeScript**
- Refactored legacy codebase to enhance performance and maintainability.
 - Reduced backend lambda execution time by several seconds in high-load scenarios
 - Eliminated redundant network calls by optimizing component state management
 - Introduced database partitioning to enhance query efficiency on large datasets
- Designed and deployed **AWS** pipelines to handle encrypted user data securely
- Collaborated with cross-functional teams in **Agile** environment

Personal projects

Leonor's App (March 2025 - July 2025)

React, TypeScript, NestJS, PostgreSQL, Prisma

A productivity platform helping interpreters prepare for meetings with clarity and focus, tailored to individual workflows.

- Customizable multilingual workspaces with color-coded resources and vocabulary.
- File management features: folder structure, annotations, highlighting, and drawing tools.
- Creation of cross-referenced notes and vocabulary entries from text selections.
- Clean and customizable UI with resizable columns, draggable sections, and theming support.

Gartic Clone (Feb - March 2023)

NextJS, TypeScript, ExpressJS, SocketIO

A simplified multiplayer drawing game inspired by Gartic Phone, featuring a single game mode and one drawing tool.

- First project using professional UI templates, which taught me the importance of design consistency and responsive layout
- Marked my introduction to WebSockets

Technical skills

- Algorithms and data structures
- Dynamic and responsive websites
- Single Page Application
- Progressive Web App
- REST API
- NoSQL/SQL
- Unit testing (JEST)
- SEO and accessibility

Personal traits

- Curious:** Transitioned from front-end to full-stack by self-learning AWS and backend technologies.
- Determined:** Learned web development from scratch while working full-time, demonstrating strong self-discipline.
- Resilient:** Remain composed and productive during long debugging sessions or high-pressure sprints.
